Internet Explorer 6 Browser with 3D support. This product includes Visual Basic Scripting Edition Runtime.

Fast, easy and innovative Play Quake online in this amazingly fast, easy and innovative Browser game. The browser game played on the browser, Quake is an online game that does not need installation, Internet Explorer, Opera or Netscape Navigator. With an extremely fast, easy and innovative Browser it is fast, easy and innovative. Experience the browser game played on the browser. One tap and start gaming. New features: - Addictive gameplay - Easy to start playing - Easy to continue with the Multiplayer! - Fast - Innovative - Fun Jewel Matching allows you to arrange gemstones of different kinds in the most efficient way, seeking to find the best 'matching'. The game consists of many levels and types of stones. Besides the jewel types, you have a 'hardware' number in the game, which implies that every particular "grid" or "ring" will have a fixed number of gems placed. Your task is to rearrange the gems so that all types are perfect matches. The game starts with an empty grid and each gem is initially set to be either red, blue, green or brown. As you can see, the first challenge is a pretty simple one. Set the red gems into red gems and the rest will follow without a problem. After this, the challenge gets harder and you need to learn to successfully combine the 4 different gem colors. Then you move to the next challenge, which has only 4 rings. So, in order to make a perfect match you'll have to decide if it is better to keep the brown gems only in the outer ring or to swap them for the blue gems in the middle one. Another more challenging decision is the big one. Here, you'll have to decide if it is better to swap the red gems with the green gems or the brown gem, which will result in more chances to win. The final challenge is much harder. It is a grid full of diamonds, and you need to rearrange the gems so that they will form a perfect match. Of course, not all of the diamonds are the same type. You have to determine which are the best and play the matching rules within them. It's not easy and there are no points to guide you. If you manage to clear the levels, you'll win the game. 200++ useful website to save your time and expense. Combine Google search with Facebook, Youtube and Twitter. Retrieve the site you want and save it to history. Return to the site saved. Organize your bookmarks in folders. Work offline! You can save your website for offline reading. Create shortcuts to specific websites, for example: abc.com/xyz. Filter the result to match exactly what you need. And much, much more! Rate: Review by Oleg Overall This is an incredible program. It opens every link you visit with a new tab. What sets it apart from its competitors is the added convenience of keyboard shortcuts. It shows bookmarks in categories which makes it easy to find what you are looking for. The last thing I can ask for is the ability to automatically transfer selected sites to links in your favorites bar. That would make this program 5 stars. I highly recommend it. Wow, this is great! It does not function as well as promised. Rate: Review by Mark Overall I think this product is awesome. I am a website manager for a major bank and normally, I have to run Google images for every person or company we deal with. It makes for some long days. I really appreciate the fact this app can go directly to the desired sites, saving me a lot of time. I have tried many programs in the last two years and NotJustBrowsing is my new favorite. Keep up the great work, I will be back for more. Rate: Review by Conor Overall I'm happy with how fast this program works and that it is very user-friendly. It actually allowed me to save more than I intended on my first run! I'm going to enjoy this app for a long time. I am a fan of old-fashioned methods of connecting with friends in an online chat environment. And I found myself wondering if there is a way to combine the chat facility of one internet service with the features of another. I tried Quinella for that purpose. The interface is not very spacious, yet it is fairly easy to use. Its main area is an interesting interface which looks like a piece of a chat room. But once you enter the chat screen, the interface changes to a simple, easy-to-use text box. The
