The Quiz Of Country And Their Capital Incl Product Key Free Download

This is a small and simple application built using the Python programming language. It helps you improve your culture about the world's capitals. Features: - A great friendly interface - Add/remove countries - Add/remove capitals - Have fun with this app Warning: THIS IS A DIGITAL GOOD ONLY. WHAT'S NEW v1.0: This update includes a bug fix You can now access the app from your browser, thanks for all your positive reviews and ratings. Have fun with this app. Enjoy! #,##0.00;-#,##0.00 Screenshots Reviews Loved it! 5 By DennisDennis I have absolutely no experience with Python, or even programming for that matter. My goal was simply to create a little fun application that can help you learn more about the world. And I was completely successful. The application has a great interface and I was able to create a few different quizzes within minutes. When the quiz is done it's automatically emailed to you, and I was so happy that I had created this tool for everyone. It gives you the ability to learn about the capitals of all the world's countries, and there is a game for each one. And each time you see a country you can add it to your favorites. Which makes things even better. This is an amazing application that I highly recommend. It has a place on my desk at all times, and I take it with me everywhere. If you can even remotely get into programming, or have just a desire to learn, I recommend this application. It's so simple, and you will be able to have fun, and learn something at the same time. Slow or delayed response 1 By MSto After submitting a quiz, you should be able to see the results immediately. The response is incredibly slow to the point where the app hangs/freezes and I have to close it and open it again to get the results. System Requirements:

Windows XP, Vista, 7, 8 or 10 AMD or Intel Core i5-760, Intel Core i3-530 or AMD FX series 3 GB RAM 15 GB HDD HDD optical drive for installation DirectX 11 graphics card 600x600 resolution The good news is that it runs through Microsoft Windows and does not need any pirated software, but the downside is that the game only supports single monitor configurations, so you'll be losing the full 4K/UHD resolution that NVIDIA and AMD showcased
