Sprout Mail [Latest] 2022

Sprout Mail is a simple email client which is provided with many general functions, such as New Account, Configuring Account, Viewing Accounts and Sending Email, etc. Sprout Mail is completely out of the box to user with no additional setup or configuration by user (except for the Add-Ins or Plugins as required). Without any add-ins, you can enjoy the feature of "MULTI-THREAD", making your emails multi-threaded. You can check your mail on all of your accounts on the same screen, and can work/read emails on several accounts at the same time. You can also use SMTP relay function for sending emails, thus you can avoid receiving the SPAM when you're not connected to the Internet. User can choose whether to receive new email in the DEFAULT VIEW or the DEFAULT TAKEN View (also supports the TAKEN View by Previous Window). The unique feature of Sprout Mail is its TICKER-WINDOW, which reminds you whenever there is a new mail message while you're working on other business. You can save all message as.EML files which can be opened by Outlook, and you can also load them using Sprout Mail, making your work easy. You can also convert your messages to HTML format by using Sprout-Mail Converter. Sprout Mail has over 20 useful plugins to enrich its features. This plugin supports 51 languages, so you can use Sprout Mail in any language you want. There are special plugins for Japan, Germany, and Dutch as well. Please refer to the download and page view for more information.
